DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I. Claims 1-19, drawn to processes for removing a reduced sulfur gas/species from a process stream, classified in class 423, subclass 220+.

Group II. Claims 20-28, drawn to methods of stabilizing an unreacted alumina support so as to be chemically nonreactive with zinc atoms from a zinc-containing compound comprising a reduced sulfur sorbent composition, classified in class 502, subclass 414.

2. The inventions are distinct, each from the other because of the following reasons:

The inventions of **Group I** and **Group II** are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that: (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, **and** (2) the subcombination has utility by itself **or** in other combinations (see MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed, because the **Group I** processes do not **require** the **Group II** methods – that is, the gas contacting processes of **Group I** do not **require** the chemical reaction steps of **Group II**. The subcombination has separate utility **by itself**, i.e., in the instantly recited stabilization methods.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. **In addition**, it is respectfully noted that this restriction is in keeping with that made in parent application serial number

09/541,204, wherein restriction was required between processes **in accordance with** the above **Group I** (i.e., original claims 1-13 in 09/541,204) and products/methods of making **encompassing** methods of the above **Group II** (i.e., original claims 14-79, noting especially claims 54-79).

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (see 37 CFR § 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17(i).
